### PROJECTS

#### Crops Recommendation System

- Built a Machine Learning-based crop recommendation system to predict suitable crops using soil and environmental data.

#### IoT Alcohol Detection System

- Built an Arduino-based alcohol detection system using the MQ-3 sensor with real-time detection and automated alerts.

#### AI Resume Builder

- Developed an AI-powered resume builder with content optimization, customizable templates, secure authentication, and PDF export functionality.

### ACHIEVEMENTS

#### Secured First Place at the Industry Hackathon 2024, Vidyalankar Polytechnic

- Led a multidisciplinary team to develop a cutting-edge solution addressing real world industry challenges, demonstrating excellence in innovation, teamwork, and technical implementation
